논문구분 원저/구연

논문분야 족부족관절

논문제목 제 2 중족족지관절의 퇴행성 관절염 : 제 2 족지 강직증

영문제목 **Degenerative Osteoarthritis of the Second Metatarsophalangeal joint: Second Toe Rigidus**

발표자 조재호 (Cho Jaeho) 책임저자 이우천 (Lee woochun)

저자 조재호, 이우천, 김정래*

기관명 인제대학교 의과대학 서울백병원 정형외과 족부센터, 대구 MS 재건병원*

증례 (or 수술술기) : Second metatarsophalangeal joint arthritis is only fleetingly mentioned during description of second metatarsophalangeal joint instability, Freiberg's infraction or trauma and we could not find any detailed description of primary degenerative arthritis of second metatarsophalangeal joint. We identified a new disease entity of patients with limitation of dorsiflexion on the second metatarsophalangeal joint similar to hallux rigidus.

acknowledgment :

metatarsophalangeal joint, rigidus
