

언어구분 ENG 논문구분 원저/구연 논문분야 고관절
논문제목 증상이 있는 **pincer type** 대퇴 총돌 증후군 환자에서 **herniation pits**
의 방사선 지표로서의 의미
영문제목 **Herniation pits as a radiographic indicator of pincer type**
femoroacetabular impingement in symptomatic patients
발표자 **Yong-Chan Ha** 책임저자 Yong-Chan Ha
저자 Kyoung-Woon Kim,Yong-Chan Ha
기관명 중앙대학교 정형외과학 교실

증례 (**or** 수술술기) : : The role of herniation pits as a radiographic indicator is still debating. This case-control study was undertaken to determine; 1) the prevalence, locations, and sizes of herniation pits, and 2) the relationship between them and structural bony abnormalities predisposing femoroacetabular impingement.

acknowledgment :

Acetabular retroversion, Femoroacetabular impingement, Herniation pit, Pincer type abnormality
